

Hint

Based on the placement of the decimal point in the chart below, what place labels should be in the boxes on the second row, and what numbers will you put in the boxes on the last two rows?

			.		
			.		
			.		

What is the value of each mark on the number line? Where will you put marks for 3.4 and 3.15? How will you decide which number has a greater value than the other one?
