## Hint

An input table can be horizontal or vertical and should include rows/columns identifying the input, the process used, and the output. In the given situation, you need to decide where to put the number of bags and the cost.

| Input | | | | |
|---|---|---|---|---|
| Process | | | | |
| Output | | | | |

| Input | Process | Output |
|---|---|---|
| | | |
| | | |
| | | |
| | | |
