

## Possible Solutions

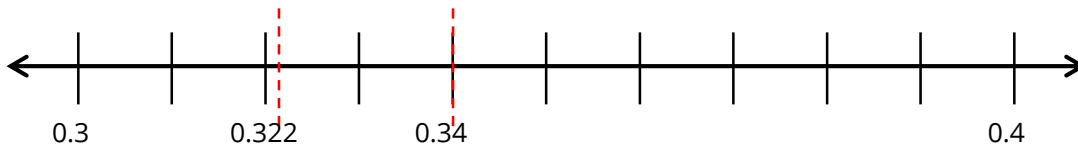

### Using a Place Value Chart

Units	.	Tenths	Hundredths	Thousandths
0	.	3	2	2
0	.	3	4	0

Add zeros in the chart when necessary to have the same number of digits for comparison.

$$\frac{340}{1000} > \frac{322}{1000}, \text{ so } 0.34 > 0.322$$

### Using a Number Line

0.34 is to the right of 0.322, so  $0.34 > 0.322$
